Product description

SimpleON technology thanks to the reduced rim to minimum makes cleaning the inside of the bowl much easier than in the case of classic rimed bowls. This solution helps to maintain hygiene in a simple way, because we have less nooks in which limescale and bacteria can accumulate. We used economical 3/5L flushing system here. The presented WC ZIP is in a version with vertical outflow, adapted for water supply from the side of the tank. The price applies to the entire set, i.e. the compact bowl together with the tank, valves and assembly kit. The set includes an exclusive slim duroplast toilet seat, soft-closing, equipped with an easy off system.
